ARTIST'S STATEMENT

Interested in European and borders issues, she focuses on how individuals and communities deal with past, traditions and collective memories, as well as the influence those have on identities. Mainly approaching her subject matters with empathy and a regard for intimacy, her practice is concerned with the notion of belonging and of sharing. Through photography Chiara is questioning the bridges between the identity of the singular and the collectivity, which she visualizes by concentrating on the human relationships in their context and with their contexts.
